

## What conditions does LYRICA treat? [1]

**Answer:**

LYRICA is a prescription medicine approved by the US Food and Drug Administration (FDA) and is used in adults to manage fibromyalgia (chronic pain all over your body), diabetic nerve pain, or pain associated with diabetic peripheral neuropathy (pain in the feet and hands from damaged nerves caused by diabetes), spinal cord injury nerve pain, and pain after shingles. In addition, it is used together with other seizure medicines to treat partial onset seizures in patients 1 month of age and older with epilepsy.
